Office of Pesticide Programs (OPP)**

**Aggregate Summary Report of Incidents
For Registered Products Containing a Specified Active Ingredient
Description of Report**

This report is generated from the **Aggregate Summary Module** of OPP's incident database. It displays numerical counts of minor and more common incidents associated with the registered products that contain a specific active ingredient. In addition to the total number of incidents for the products, counts of effects for various exposure types and severity categories are displayed as well.

This report reflects incident information mostly submitted since the publication of the final regulations regarding section 6(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), which took effect on August 17, 1998. The regulations established a new requirement that registrants report minor or common incidents as an aggregate count of incidents and effects for their products. OPP also re-formatted some submissions received prior to the effective date of the regulations because the information was better suited to the aggregate summary presentation format.

The active ingredient number (PC Code) and name are displayed on the top of the report and at the far left side of the report. Then reading from left to right, the information is displayed as follows:

- Package Number which is the unique identifier of the submission;
- EPA Registration Number of the product that contains the specified active ingredient;
- Total number of incidents for that registration number;
- Counts of effects for each exposure type/severity category.

Overall totals for the number of incidents and effects for each exposure type/severity category are presented at the bottom of the report.

In some cases, the registration number of the product associated with the incident may not have been known or reported to the registrant, but the active ingredient was reported. In those instances, a general identification of the product or active ingredient is provided.

Exposure Type/Severity Category Codes:

H-D	Minor human incident
H-E	Human incident-symptoms unknown or not specified
D-A	Domestic animal death
D-B	Major domestic animal incident
D-C-D-E	Moderate and minor domestic animal incident and/or symptoms unknown or not specified
D-C	Moderate domestic animal incident
D-D	Minor domestic animal incident
D-E	Domestic animal incident-symptoms unknown or not specified
W-B	Minor wildlife incident
P-B	Minor plant damage incident
ONT	Incidents involving other non-target organisms
G-B	Moderate water incident (includes groundwater, surface water, drinking water)
G-C	Minor water incident (includes groundwater, surface water, drinking water)

Some registrants have also refined the Exposure Type/Severity Category Codes, which appear on the report as follows:

DWB	Moderate drinking water incident
DWC	Minor drinking water incident
GWB	Moderate groundwater incident
GWC	Minor groundwater incident
SWB	Moderate surface water incident
SWC	Minor surface water incident
PDB	Moderate property damage incident
